

Climate Change Implementation

*This .pdf document was created to furnish links to websites, ideas, online documents or other resources that provide means by which current utility corporations, automobile manufacturers and other groups affiliated with the production and use of energy can shift from using fossil fuels as source(s) to using renewable energy. **Please follow style pattern, as established.***

The Apios Institute:

http://www.coastalwiki.org/wiki/Effects_of_global_climate_change_on_European_marine_biodiversity

Group devoted towards promoting low-impact biodiversity tactics.

General Notion: Utility corporations (and the public) need to be convinced that changing to a renewable energy grid is both necessary and sustainable. Countries like Germany can provide a feasible model for implementation and rapid positive result.
